Project in collaboration with

African club cup for Championship

On January 4, the woman national team, represented for this occasion by 17 girls between 16 and 35 years old, have left Dar to go to Kenya in order to take part in the African Champions Cup for club, that every year takes place in a different African state. After 16 hours of journey by bus, the girls have reached Nairobi, where they have been hosted in the temple of the Sikh community.

At the tournament, have participated 9 men's teams and 10 woman's team, coming from different country like: Ghana, Kenya, Uganda, Egypt, Nigeria and of course Tanzania. Two team in each category has represented most of the countries, while Tanzania had only the national woman's team, that for the tournament has been adapted like a Club called Dar Ladies.

The different teams were placed in two groups, the one of Tanzania was composed by: two teams of Ghana, one of Uganda and one of Nigeria.

The girls have played with all the team trying them best, but they classified at the last place in the group.

So, they played the final for 9th and 10th place versus the Uganda team and they won 1-0.

Tanzania had also a young lady of 23th years that has participated as umpire, who has performed for the first time in four international level matches.

This tournament has been another important experience for the girls, still very young compared to the other teams; they have gotten the possibility to meet other teams from other countries and played important competitions.

The result of this tournament shows the big work already done in Tanzania, but even that still there is a lot to do in a country like Tanzania to develop Hockey.

In fact all the other countries sent the teams to the African Cup that are the best in their national league, while for Tanzania this is almost the only girls team in all the country. That's why our hope is to organize even this year the Tanzania woman league at national level.
