

Everything resonates, including you!

We are permanently exposed to large amounts of Electromagnetic Fields (EMFs) from non-natural radiating sources. All mobile phones, cell towers, 3G/4G/5G, WiFi, PCs, laptops, smart meters, but also powerlines and even your wall socket etc. are electromagnetic radiators that also have an unnatural left-rotating field.

Our body consists for almost 65% of water that resonates (vibrates) at various EMF frequencies. As a result, our body's own frequencies, and therefore our bio-energetic field, become out of balance. Due to the enormous increase in wireless connections, this has an increasingly far-reaching effect on our well-being.

A lot of research into alleged effects of EMF transmitters

The industry often relies on the harmless thermal effects, but scientific studies show the harmful non-thermal effects that EMF emitters have on the human body.

The emissivity of EMF transmitters is increasing rapidly

Both indoors (WiFi, PCs, laptops, tablets, mobile phones, etc.) and outdoors (AM & FM radio stations, 3G/4G/5G transmission towers, high voltage towers and in almost all public spaces).

Potentially serious health effects of 5G internet

Meanwhile, 180 scientists and doctors from 36 countries warn of the danger of the implementation of the 5G network. This will lead to a huge increase in exposure to EMF radiation.

Introducing superfast 5G internet everywhere in the streets

Superfast 5G internet will be introduced in more and more places the coming years. Due to the higher frequencies required for this, it is necessary to install more transmission towers and small antennas.

Power Boost Strips

At the top and bottom of the EMF Safe Card you will find the Power Boost Strips. You can make direct contact with the quantum resonator with your thumb and forefinger. Under the influence of your own bio-magnetic field, a "boost" occurs that can be used to get extra energy or to help repair a local complaint.

EMF SAFE CARD

The Marvalous Health EMF Safe Card is an innovative, patented card that has been specially developed to greatly reduce the negative effects of EMF in a very effective way. Not by blocking the radiation, but by converting non-natural EMF into the right harmonic quantum resonance frequencies in support of our body. Always and everywhere.

Abundant calcium influx causes cell damage

In an issue of Neuron magazine, Johannes W. Hell, professor of pharmacology at Davis University in California, reports:

"Too much calcium influx (due to non-natural EMF) is a cause of brain cell dysfunction in Alzheimer's disease and causes neuronal damage during and after a brain haemorrhage. It also contributes to chronic pain."

Harmful, non-thermal effects

Although most non-natural EMF radiation does not have harmful thermal effects, there are non-thermal effects that can cause serious damage to health. "Research shows that an abundance of calcium can flow into the cell under the influence of non-natural EMF radiation. This then activates various processes in the cell that lead to the production of harmful free radicals." (M.L. Pall, *Environmental Research* 2018)

A unique concept

The unique way in which the EMF Safe Card works ensures high effectiveness with a range of approximately 3 meters. You can always carry this card with you and put it on your bedside table at night. This way you are continuously protected against the harmful influences of non-natural EMF radiation, always and everywhere.

The compact EMF Safe Card has the dimensions of a credit card and is approximately 6 mm thick. The materials from which the card is made are 100% natural, non-toxic and fully recyclable. The card was developed and produced in the Netherlands.

Operation

The card is mainly aimed at stabilizing the natural water cluster structure. Intracellular water is an important buffer to protect body cells against all forms of EMF radiation. We have adapted evolutionarily against natural EMF radiation, such as cosmic radiation (at lower altitudes) and UV radiation from the sun.

The EMF Safe Card contains a special alloy of metals and uses the non-natural EMF radiation to strengthen our body's own bio-energetic field. One of these materials is bismuth, the corresponding frequency of which promotes concentration, helps with tension and fatigue and aids digestion.

Disclaimer: Marvalous Health makes no claims to cure or prevent any illness with the card and has a 30-day "dissatisfied money back" policy.

Measured effects

The operation of the EMF Safe Card has been tested under different conditions using an H3 Lecher Antenna. In addition, experiments show that the EMF Safe Card has a positive effect on the crystal formation of water. This supports the protective effect on water structure clusters as they occur in our body.

Various scientific articles show that EMF radiation disrupts the structure of water clusters. The functioning of the EMF Safe Card is based on the positive influence that the card has on water clustering and regulation of cellular calcium influx (ref. e.g. S.N. Ayrapetyan - Bioelectromagnetics and M.L. Pall - Environmental Research, 2018).

ALWAYS & EVERYWHERE PROTECTED

The water in our body has a protective function

In a natural situation, water molecules organize themselves in water clusters and protect us like a kind of chain mail: a protective vest of structured water.

Natural EMF radiation supports and enhances the protective function of water molecules

We evolved under the influence of natural radiation from the sun, cosmos and the earth itself. These natural frequencies partly support the protective water cluster structure.

Non-natural EMF radiation weakens the protective effect of the water cluster structure

Unnatural EMF radiation from 3G / 4G / 5G transmitters, WiFi, cell phones and other EMF emitters disrupts the subtle balance of the water clusters in our body.

As a result of this harmful radiation, we lose our natural protection, which causes us to become unbalanced, our cell function is negatively affected and, in the long run, physical and mental disorders can arise.

The EMF Safe Card strengthens, stabilizes and restores the structure of water clusters

The Marvalous Health EMF Safe Card can restore the protective water cluster structure and almost completely inhibit the negative effects of EMF on our body. The card resonates at a natural harmonic frequency and thus supports the natural structure of water clusters.

The use of the EMF Safe Card can offer a solution for sleep disorders, headaches, fatigue, depressive complaints, restlessness and other complaints related to non-natural EMF radiation.
